## SCULPEY LIQUID POLYMER CLAY 'BLACK' 30ML

**SKU:** SCULP ALS3521

**Price:** \$7.77

### Product Description

Liquid polymer clay is a versatile product that can be used in Sculpey bakeable silicone molds, to embellish clay, used as grout, image transfers, window clings and so much more! So simple to use it is perfect for beginners! Twist cap for precise flow control ? open completely to fill mold. Open half way for other detail work. Gently stir before using. Strong and flexible after baking making it perfect for home decor, jewelry, scrapbooking and beyond. To thin - add Sculpey? Clay Softener until desired consistency is reached. To thicken ? pour into a cup and let sit out overnight Add items such as glitter, spices, dried flowers and metal pieces to add interest to your creations before baking! Excellent leveling properties, which allow it to be baked in sheets and poured into jewelry findings. Liquid polymer clays do not give off toxic chemicals during the curing process. However, you will experience a slight odor and smoking which is non-hazardous. To minimize this, we suggest using an oven hood fan and if you are using molds, only bake one at a time. We always recommend using an oven thermometer. Many times, ovens are not calibrated accurately, and are actually hotter than the temperature set on the dial. Just pre-heat your oven for 15-20 minutes which should be long enough to reach the temperature on the oven thermometer needed to cure your project.
