

Rexel T40 Thermal Binder

Acco Rexel T40 thermal binder is the "bigger brother" of the two and is capable of binding as many as 400 sheets into one neat, professional looking document. The T40 is an ideal personal use thermal binding machine. It comes with an auto shut off that kicks in after 15 minutes of no use - just in case you forget to switch off once you have finished. It also has a push button control panel which includes audio and visual signals, as well as variable binding cycles. The T40 thermal binder from Acco Rexel is new, modern and stylish and is backed by a 2 year warranty. It weighs just over 1kg meaning it is light and ideal for the desktop but small enough to be packed away in a drawer or placed on a shelf. AC*4400411
