Product Description

Jacquard's most versatile product yet, Pearl Ex Powdered Pigments may be used any time a metallic or pearlescent effect is desired: mix them into acrylics, oils, printing inks, encaustics, alcohol inks, epoxy, glues, casting resins, clay, varnishes?the list goes on!

Try it mixed with [Gum Arabic](#) for a DIY metallic calligraphy ink or watercolor, in the [Pearl Ex Varnish](#) for working on non-porous surfaces, or mixed into one of Jacquard's [colorless extenders](#) for use on fabric.

Pearl Ex is a safe, inert pigment that exhibits extreme colorfastness and stability. The different particle sizes produce different effects, from a smooth pearly luster, to a highly metallic sheen. Pearl Ex creates a metallic effect without being a real metal?it will never tarnish or fade!

Note: Pearl Ex Powdered Pigments were specifically developed as an art material. They are NOT for cosmetic use.

FABRIC/FIBER/SURFACES polymer clay, encaustics, paper, shrink plastic, leather, glass, canvas, wood, and more! Mix with a binder to use on natural and synthetic fibers.

Please note that the jars are all the same size however the pigments can either be 21g or 14g inside depending on the pigment color
