

Jacquard iDye Poly For Synthetic Fibers 14gr

SKU: JAC JID

Price: \$9.32

Product Description

Dye Poly is virtually the only dye that will color polyester. In fact, it will color almost anything synthetic, including plastics and nylons, buttons, frisbee discs, Worbla & Thibra, 3D printed objects, toys, dolls, wigs, cleats, urethane coatings and more. The dye comes in a dissolvable packet, so there are never any messy powders to handle: simply drop the packet in a pot of water, add the fabric or objects and bring to a simmer.

An essential tool for cosplay artists!

FABRIC/FIBER/SURFACES polyester, nylon, poly/cotton blends*, plastics and more
