### Product Description

These concentrated poster paints of fine quality are easy to use and allow for the creation of impressive opaque effects. They can be diluted depending on the desired result. Once dry, colours remain bright and intense and can be used on different types of surfaces such as paper, cardboard, wood, textiles, glass, metal, terra-cotta and plastic. To increase the opaque effect use a colour to white ratio of 10:1, to obtain delicate pastel shadings use a colour to white ratio of 1:10.
