Product Description

This bakeable adhesive clay forms an incredibly strong bond between two pieces of polymer clay.

- Adhere raw clay to raw clay; raw clay to baked clay and baked clay to baked clay.
 - This bakeable clay adhesive can be used to adhere clay to porous materials such as wood or paper.
 - Polymer Clay pieces can be joined together with little pressure to prevent distortion of shapes and fine details.
 - Twist cap for precise flow control!
 - Must be baked to cure
 - 2 fl oz.
